Home Screen

On this screen, user can have a look at top items that other users are buying frequently. Users can also find the name of the item, cost of the item.

At the bottom of the page, user have pagination to go to next page and have a look at other frequently bought items.

The “checkout” image for easy access to find out what are already in cart and place the order.

Home Screen

Design principle applied

- User wants choices: Easy to filter gift items of certain category, frequently bought items

What else?

- More intuitive information about user by providing his/her name if available (if returning user with profile created earlier)
- Collapsible menu to filter items without compromising the screen space to display items.

Home Screen with collapsible menu to filter items that user is interested in.
